SUMMARY

Senior QA Lead with 10+ years of experience driving end-to-end quality strategy, leading distributed QA teams, and building scalable automation frameworks. Expert in Playwright, Cypress, Selenium, REST API testing, CI/CD integration, and shift-left quality initiatives. Known for transforming legacy manual processes into modern, automation-first pipelines that reduce release cycles and improve product reliability.

CORE SKILLS

Test Leadership & Strategy

Automation Framework Design

Playwright | TypeScript | JavaScript | Java | Python

API Testing (Postman, REST Assured)

CI/CD (GitHub Actions, Jenkins, Azure DevOps)

Test Planning, Estimation & Risk Analysis

Performance & Reliability Testing

BDD (Cucumber / Gherkin)

Cloud & Container Testing (AWS, Docker, Kubernetes)

Agile / Scrum / SAFe

PROFESSIONAL EXPERIENCE

Senior QA Lead @ Finexus Digital Solutions, Austin, TX

Jan 2021 – Present

Lead a team of 9 QA engineers spanning automation, manual testing, and performance.

Designed a TypeScript + Playwright automation framework reducing regression cycle from 4 days to 6 hours.

Implemented API validation using Postman + Newman integrated into GitHub Actions.

Developed quality KPIs for release gates, resulting in 45% fewer production defects.

Created comprehensive test strategies for complex payments, authentication, and security modules.

Championed shift-left practices â€” embedded QA into early stages of design & grooming.

Mentored engineers into automation-focused roles through training and pair testing sessions.

QA Lead â€” BrightWave Tech, Denver, CO

2017 â€” 2020

Managed QA for a large-scale B2B SaaS platform used by 20k+ enterprise clients.

Migrated legacy Selenium tests to a modern Cypress framework, improving test stability by 60%.

Set up automated performance tests using k6 and integrated them into the CI pipeline.

Developed test data strategies using dynamic data generation and environment-based configs.

Collaborated with product and dev leads to define acceptance criteria and release quality standards.

Senior QA Engineer â€” NovaSoft Systems, Dallas, TX

2014 â€” 2017

Designed end-to-end automation suites covering UI, API, and database validations.

Implemented a data-driven automation framework in Java + TestNG.

Reduced bug turnaround time by 30% by improving defect triage and reporting flow.

Conducted root-cause analysis for recurring production issues and created preventive tests.

EDUCATION

B.S. Computer Science
University of Colorado Boulder
2014

CERTIFICATIONS

ISTQB Advanced Test Manager

Certified Scrum Master (CSM)

AWS Cloud Practitioner

Postman API Automation Expert

TOOLS & TECHNOLOGIES

Playwright · Cypress · Selenium · Jest · Mocha · TestNG
Postman · Newman · REST Assured
Docker · AWS · GitHub Actions · Azure DevOps
JIRA · Confluence · TestRail · qTest
MySQL · MongoDB · Redis
K6 · JMeter

ACHIEVEMENTS

Built automation frameworks used across 3 enterprise teams, saving 800+ engineering hours yearly.

Introduced contract testing using Pact, preventing API-breaking changes pre-release.

Improved cross-team collaboration by introducing QA kickoff meetings for major features.

PERSONAL PROJECTS

Quality Engineering Toolkit (Open Source)

A collection of Playwright utilities, API wrappers, and CI templates used by multiple QA teams.

Synthetic Test Data Generator

Node.js tool that generates dynamic test data for UI + API tests.
